Where your expertise is needed

AUTODOC is the largest and fastest growing auto parts ecommerce platform in Europe. Present across 27 countries with around 5,000 employees, AUTODOC generated revenue of over €1.3 billion in 2023, supplying more than 7.4 million active customers with its 5.8 million vehicle parts and accessories for car, truck, and motorcycle brands. Curious minds, adventurous experts and tech-savvy professionals - one team, one billion euros revenue. Catch the ride!

What we're looking for

Design and deliver state-of-the-art Data & Analytics solutions, to support business decisions.

Identify and analyze patterns in data, communicate insights and trends.

Develop sophisticated descriptive and predictive analytical models.

Responsibilities

- Design, develop & deploy advanced analytical solutions, to facilitate data-driven decision making.
- Build strong partnerships with business stakeholders, to ensure a deep understanding of business needs and delivery of relevant and effective solutions.
- Facilitate a clear definition of business metrics and KPIs.
- Collaborate closely with Data Engineers to define and build reliable data products and pipelines.
- Communicate insights effectively, via interactive and user-friendly BI dashboards and reports.
- Establish best-practices to ensure highest data quality and reliability standards; establish quality control mechanisms and contribute to enhancing stakeholders' trust in data and insights.
- Proactively identify, resolve and optimize performance and user experience issues.
- Lead, mentor, train and support junior colleagues and business power-users.
- Maintain effective and up-to-date documentation and training / onboarding materials.

Qualifications

- 5+ years of experience as Business / Data Analyst, Analytics Engineer or similar.
- Proven hands-on experience with delivering exceptional data products and analytics solutions.
- Proven ability to present and communicate meaningful insights and recommendations.
- Expert level proficiency with **SQL and Python** – a must.
- Familiarity with BI tools (Metabase, Power BI) – an advantage.
- Familiarity with e-commerce, supply-chain management - an advantage.
- Self-learner, problem-solver, multi-tasker and a team-player.
- Fluent in English, both in verbal and written form (C1 level or equivalent).
- Background in a STEM degree, relevant technical field or equivalent practical experience.

Perks at work

- Competitive salaries based on your professional experience
- Fast growing international company with stable employment
- Annual vacation of 24 days and 1 additional day off on your birthday
- Voluntary medical insurance (VMI) after the probation period
- Mental Wellbeing Program –providing you and your immediate family members with free and confidential mental and physical health support services for a wide range of personal and work-related issues
- Opportunities for advancement, further trainings (over 650 courses on soft and hard skills on our e-learning platform) and coaching
- Free English and German language classes
- Referral Program with attractive incentives
- Flexible working hours and hybrid work

We celebrate diversity and are committed to building teams that represent a variety of backgrounds, perspectives and skills. All employment is decided on the basis of qualifications, merit and business need.

AUTODOC does not accept unsolicited CVs from recruiters or employment agencies in response to the AUTODOC Careers page or an AUTODOC social media post. Any legal offering in this regard as well as any Terms and Conditions of recruiters or employment agencies are expressly rejected by AUTODOC. AUTODOC will not consider or agree to payment of any referral compensation or recruiter fee relating to these unsolicited CVs. AUTODOC explicitly reserves the right to hire those candidate(s) without any financial obligation to the recruiter or agency.
